

Carbon Pile Load Tester

600 AMP with Starter Motor / Alternator Tester

Head Office:
Unit 30 / 76 Hume Highway
LANSVALE NSW 2166
Tel: (02) 9755 7851 Fax: (02) 9755 7852

This 600 Amp Carbon Pile Load Tester has been the preferred battery tester of most battery professionals throughout the world. Despite the introduction of advanced multi-functional digital equipment, this proven performer still remains a "Must Have" for all good auto electricians, mechanics, battery professionals and home workshops.

Battery Test

Featuring adjustable load ranging between 0 - 600 amps, this popular battery tester provides the true CCA of 12 volt batteries up to 1,200 CCA or 200AH. An audible alert sounds after 15 seconds test time ensuring easy operation. It also features dual colour coded volt meter and amp meter providing a simple temperature compensated "Pass / Fail" test in addition to the batteries capacity.

Starter Motor Test

This versatile battery tester is also capable of checking the vehicles starting system.

Alternator Test

It can also measure the charging system voltage while the engine is running to ensure that the regulator and alternator output is operating properly.

Features & Benefits

- ➔ 600 Amp load adjustable carbon pile
- ➔ Great for simulating actual cranking loads
- ➔ Simple to use
- ➔ Uses cost effective technology for accurate testing at an affordable price
- ➔ Quick 15 second results
- ➔ Colour coded temperature compensated "Pass / Fail" test
- ➔ Up to 1,200 CCA range
- ➔ Measures starting & charging system voltages
- ➔ Tests 6 & 12 volt batteries
- ➔ Colour coded separate voltmeter and ampmeter
- ➔ Heavy gauge solid copper wire leads
- ➔ Insulated heavy-duty battery clamps

12 Months Replacement Warranty
