TROUBLE SHOOTING GUIDE:

**\*\*Before testing the charger the receiving battery MUST be checked\*\***

1. Test battery with digital battery tester such as BT001 / BT002
  2. If battery is "bad / replace" replace battery
  
  1. Check power is on and a solid connection is evident
  2. Check all leads and check for loose cable under plastic covers on clamps
  3. Use of product outside of recommended specifications voids warranty
- 

WARRANTY PROCEDURE:

1. Once product has been tested and will not perform to specifications contact Matson.
2. Matson will advise if product is required to be shipped back to Matson for inspection.
3. If product is to be shipped back to Matson you must obtain a "return authority number"
4. All warranty claims are to be handled by Matson Automotive Industries Pty Ltd
5. All warranty claims must be supported by original invoice
